Getters for Hermetic Packages

Materials that Absorb Moisture or Gas Contaminant within a Sealed Package

Getters help manufacturers of hermetically sealed packages be confident that their packages will maintain their required life expectancy, free from harmful contaminants that can poison or damage the device.

STAYDRY® Getters are products developed to meet stringent microelectronics requirements enabling hermetic package manufacturers security and peace of mind to meet industry reliability standards.

When Performance Matters

- JEDEC, MIL STD 883 and NASA outgassing requirements
- Extremely low outgassing
- Adhesion to variety of substrates
- Easily reworkable material
- Proven solution to eliminate harmful contaminants
